From: Dr. Louise Dufour-Zavala
Date: _____

I AGREE TO COMPLY
WITH THESE
REQUIREMENTS
Initial: _____

Please use this letter to serve as instructions specific to the upcoming shipment.
PROCEDURE FOR BRINGING (company) _____ MG POSITIVE
BREEDERS INTO GEORGIA FOR PROCESSING, (date) _____

1. Treat birds with an approved drug for at least 3 days at full therapeutic dose.
2. Load birds for a minimum of 3 days after the end of the treatment period (or follow proper withdrawal period).
3. Process on a Friday, in this case, on (date) _____ last load of the week).
4. Make sure the crews are asked to take a shower immediately after they get home or before they go to another farm. This is important to avoid transmission of MG to other birds that they may come in contact with. Their personal vehicles should also get sanitized if they are going to travel to other farms in the same vehicles.
5. At the Plant: Thoroughly wash first, then sanitize the truck bay area, coops, trucks and equipment after processing, as the plant's normal procedures dictate. The weekend down time will help decrease possibilities of disease transmission.
6. Address of the Farm: _____
Route to the Plant: (Outlined here)

7. Please be reminded that you need a special entry permit for these birds from the GA Dept of Agriculture. Please send a letter requesting a permit along with a copy of this document to GDA.
