

New Portal Feature!

There is a new feature on the portal under the “Reports” section to assist in queries within your company. Follow these steps to get to the new feature:

Portal Home Page > [Reports](#) > General Reports (below Billing Reports section) > [Test Query](#)

Portal - Home Page

Accession No		Submitted From		To		Purpose	All	
Hatchery	All	Grower	All			Specimen	All	
Diagnosis	All	Reason	All			Branch	All	
								Clear

The purpose for adding the “Test Query” under the “General Reports” is to assist in filtering down types of tests when looking at data. For example, for preslaughter serology results, you might be interested in IBV titers only. Previously, you had to sort through all the serology data for the selected age range and bird type. With this new change on the portal, you can search for one test at a time (ELISA:IBV) and get only those results.

Following are other new capabilities within this feature:

- Track flocks by number instead of farm name
- Look at only your diagnostic accessions

The addition of this new feature was a result of feedback from one of our valued customers. If you have suggestions of how we can improve our portal or about this new feature, please contact please contact Len Chappell (706-889-6225) or Bethany Coggins (770-853-5793).

Tours and Visitors

- March 6-8: Salmonella Workshop
- March 8: House and Senate Appropriations Committee
- March 13: Hall County Chamber of Commerce
- March 14: Boehringer Ingelheim
- March 19: Dr. Laura Chen
- March 20: Gainesville Convention & Visitors Bureau
- March 21: North Habersham Middle School
- March 21: Geoff Bright—World Bioproducts
- March 28: USDA Officials
- March 29: Banks County High School

2018 Salmonella Workshop attendees
